4 questions were selected:

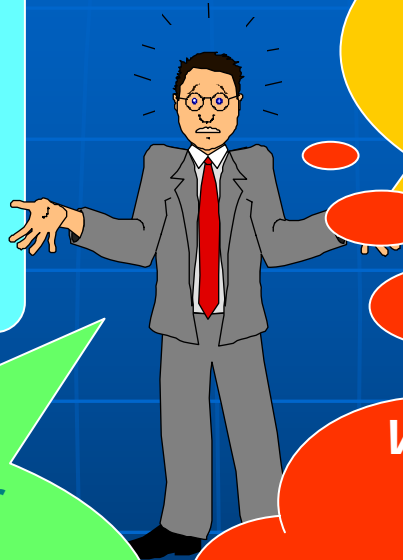

International
Network
Of Basin
Organizations

What are the success and failures stories of hydro solidarity and IWRM at basin level?

How to organize and enable stakeholders participation ?

How can transboundary water resources be managed more sustainably by all the riparian countries concerned?

What are the tools to be used for better basin management and transboundary cooperation over surface and ground water ?

- 2 co-Chairs:

to open the session and facilitate the debate among all the participants.

- 2 to 4 selected speakers will intervene for approximately 10 minutes each:

- to provoke the thoughts of the audience
- to raise the interest of the audience,
- to identify the sensitive points to be discussed,
- to launch the debate.

The speakers will NOT present the work of their own institutions.

They will talk on behalf of the topic...

...not on behalf of their respective institutions!

- 2 Rapporteurs for every session, identified based on the same criteria.

The Chairs and Rapporteurs of every session will present the conclusions of debate during the Synthesis session.

may be willing to help in the organization of the session by making other sorts of contributions such as:

- contributing with data,
- scientific and/or technical support,
- editing session material,
- promoting session...

The group of:

- Chairs,
- Speakers,
- Rapporteurs,
- Coordinators and other contributors

will be considered as **the Session consortium of conveners.**

- 1) on the scale of local, national or transboundary basins of rivers, lakes and aquifers;**
- 2) based on integrated information systems, allowing knowledge on resources and their uses, polluting pressures, ecosystems and their functioning, the follow-up of their evolutions and risk assessment.**
- 3) based on management plans or master plans that define the medium and long-term objectives to be achieved;**
- 4) through the development of Programs of Measures and multiyear priority investments;**
- 5) with the mobilization of specific financial resources, based on the « polluter-pays » principle and « user-pays » systems;**
- 6) with the participation in decision-making of the concerned Governmental Administrations and local Authorities, the representatives of different categories of users and associations for environmental protection or of public interest.**

La gestion des ressources en eau doit être organisée:

- 1) à l'échelle des bassins versants, locaux, nationaux ou transfrontaliers, des fleuves, des lacs et des aquifères,**
- 2) en s'appuyant sur des systèmes intégrés d'information, permettant de connaître les ressources et leurs usages, les pressions polluantes, les écosystèmes et leur fonctionnement, d'identifier les risques et de suivre les évolutions.**
- 3) sur la base de plans de gestion, ou schémas directeurs, fixant les objectifs à atteindre à moyen et long terme,**
- 4) par la réalisation de programmes de mesures et d'investissements prioritaires pluriannuels successifs,**
- 5) en mobilisant des financements spécifiques, sur la base de l'application du principe " pollueur-payeur " et de systèmes " utilisateur-payeur ",**
- 6) avec une participation à la prise des décisions, des administrations gouvernementales compétentes, des autorités territoriales concernées, des représentants des différentes catégories d'usagers et associations de protection de la nature ou porteuses d'intérêts collectifs.**
