

2016 WFD reporting online tools

2nd WFD Reporting Workshop

25th and 26th February 2016

Jean-Philippe Goyen Onema - FRANCE

PLAN

Back to 2010 reporting

eaufrance 2. 2016 French WFD reporting test tool: presentation of services, main features

Redmine useful features as a project management tool for 3. reporting

Conclusion

1 – Back to 2010 reporting

➤ Needs to improve the technical WFD reporting process

- Providing clear wording of errors and immediate solution
- > Improving data consistency and final controls before delivering data
- Making files management simpler, more efficient and fully traceable
- ➤ Performing the technical assistance for the Ministry and RBDs

2 – 2016 French WFD reporting platform

2.1 - Overall schema

2 – 2016 French WFD reporting platform

2.2 - Simplified files schema

2 – 2016 French WFD reporting platform

2.2 - Simplified files schema

2 – 2016 french WFD reporting platform

2.5 – EIONET dependencies

- > System depends critically on EIONET system:
 - Depository of Xquery files must be accessible at all times (like Xsd files)
 - Xquery files should be strictly equivalent to the last effective production version used in EIONET QA online test and not the current development version

2 – 2016 french WFD reporting platform eaufrance 2.3 - Online live demo

2 – 2016 french WFD reporting platform

2.4 - Main features summary

Features	Status
XML Validation versus XSD	✓
QA process	✓
Statistics of QA process	✓
Translation (and edition) of error messages for Validation and QA process	✓
Annex 0 error messages management	✓
Cross Schema Checks	✓
→ GML geometry checks	✓
National consistency (inter RBD) checks	✓
→ Data vizualization	✓

3 - Redmine, project management tool

- > Flexible issues tracking system
 - > Pooling national experts answers to avoid multiple message exchanges
- Document sharing
 - National documents (pushed by email)
 - > Background documents for reporting repository
- > Special repository to associate documents with URLs for alternative EIONET QA testing
- > Users are a directory of people involved in reporting process

Conclusion

- ➤ WFD Reporting files management should be significantly simplified
- Precise and effective traceability of reporting process
- ➤ Interbassins and temporal (2010 Vs 2016) statistics should be available almost instantly after file deposit

Thank you for your attention
