COP21·CMP11

## Paris Pact on water and adaptation to climate change in the basins of rivers, lakes and aquifers

We, representatives of governments, international organizations, donors, national and transboundary basin organizations of rivers, lakes or aquifers, local authorities, of the civil society and companies, support the integration of fresh water into the Global Climate Action Agenda, especially for initiating or strengthening necessary adaptation actions in the basins of rivers, lakes, aquifers, large wetlands as well as coastal areas.

### GENERAL STATEMENT

Climate change is already affecting and will increasingly affect the quantity and quality of freshwater and aquatic ecosystems, especially through the intensity and greater frequency of extreme hydrological events, such as floods and droughts, as well as the increase in ocean level, which

## 357 SIGNATORIES!!

We recognize that adaptation actions should be undertaken without delay to minimize the impacts of climate change on the populations' health and safety, on economic development and the environment, considering the importance of the protection of water-related ecosystems.

The basins are natural areas where water flows on the surface and in the subsoil: they are the relevant territories for organizing water resources management.

In order to ensure more effectiveness, these actions to adapt to climate change should thus be implemented at the level of river, lake and aquifer basins, through a joint, participative, integrated and sustainable water resources management.

### We should act quickly before it is too late!

To that end, mobilizing new and increasing funding dedicated to climate change adaptation in basins is essential. Therefore, new basin organizations and existing ones should be financed and strengthened to facilitate the cooperation, coordination and exchange of information, dialogue, consultation and prevention of conflicts between stakeholders and to enhance the implementation of adaptation measures and the sharing of benefits on the basin scale,

We encourage donors to support prior assessments and actions for adaptation to climate change in basins,

Local authorities and communities, economic sectors and the civil society should be better associated and involved in basin management, including in the definition and implementation of adaptation measures.

Cooperation and exchange should increase between the institutions involved, especially among the basin organizations at the global and regional levels in order to facilitate the transfer of experience and know-how on best practices in basin management and adaptation to climate change.

# Paris Pact on water and adaptation to climate change in basins

## RECOMMENDED ACTIONS:

### **1) Reinforce capacity development and knowledge,**

Establish risk warning and water information systems in a context of uncertainty.

### **2) Adapt basin management planning to climate change,**

Better controlling water demand and developing a more efficient and sustainable use of water resources (including groundwater) - Enhance the services of water-related ecosystems

### **3) Reinforce governance,**

Create new basin organizations and reinforce existing ones

Support mechanisms for the involvement of the stakeholders in basin management.

### **4) Ensure adequate financing.**

Establish investment program and sustainable financing mechanisms

**We do not have to reinvent the wheel to act quickly!**

# OUTCOME DOCUMENT OF THE ACTION EVENT ON WATER

## In short term (2017- COP23):

- Confirm the water action day on the Global Climate Action Agenda of the COP.
- Create, within the general framework of the Global Climate Action Agenda, a formally recognized multi-stakeholder dialogue space for the water international community to maintain the momentum of water between COPs and to prepare the Water Action Day.
- Support countries, especially in Africa, in how to include ambitious, credible, and robust water programs in their NDCs for both climate mitigation and adaptation, and to promote the relationship of water in the NDCs and NAPs with the SDG;
- Create a water and energy hub for exchange and capacity building to assist developing countries, African countries in particular;
- Launch two pilot projects related to National Water Information Systems;
- Establish multi-parties dialogues in the pilot hydrographic basins, in order to identify water related challenges and opportunities for collaboration between local actors and also propose adaptation projects in the water sector.

*To ensure the follow-up of these dynamic, the Moroccan Ministry of Water will work on the launch of all these short term actions with the coordination of the COP23 Water Action representatives and all international organizations involved in the water sector.*

## Revised Thematic Framework Proposal to ISC

### The Thematic Structure – at a glance

## SUGGESTED THEMES

### **CLIMATE – Water security and climate change**

(SDG links: SDG 13, SDG 11.5, COP 21-22, Sendai DRR Summit)

- a. Managing risk and uncertainty for resilience and disaster preparedness – IR 1.3
- b. Water and adaptation to climate change
- c. Water and climate change mitigation
- d. Climate science and water management: the communication between science and decision/policy making

### **PEOPLE - Water, sanitation and health**

(SDG links: Water targets 6.1, 6.2, 6.3, 6.B and SDG's 1 and 3)

- a. Enough safe water for all – IR 1.1
- b. Integrated sanitation for all – IR 1.2
- c. Water and public health

### **DEVELOPMENT - Water for sustainable development**

(SDG links: Water target 6.4 and SDG's 2, 7, 8, 11 and 12)

- a. Water, energy and food security nexus
  - Water for Food - IR 2.1
  - Water for Energy - IR 2.2
- b. Inclusive and sustainable growth, water stewardship and industry – IR 3.1
- c. Efficient use of surface water and groundwater - urban and rural
- d. Infrastructure for sustainable water resource management and services – IR 1.4

### ***URBAN – Integrated urban water and waste management***

(SDG links: Water target 6.3 and SDG's 11 and 14, HABITAT 3)

- a. Water and cities – IR 2.3
- b. The circular economy – reduce, reuse, recycle
- c. Treatment and reuse technologies

### ***ECOSYSTEMS - Water quality, ecosystem livelihoods and biodiversity***

(SDG links: Water targets 6.3, 6.6 and SDG 15)

- a. Managing and restoring ecosystems for water services and biodiversity – IR 3.2
- b. Natural and engineered hydrological systems
- c. Water and land use
- d. Ensuring water quality from ridge to reef – IR 3.3

### ***FINANCING –Financing for water security***

(SDG link: SDG's 6 and 17)

- a. Economics and financing for innovative investments – IR 4.1
- b. Financing implementation of water-related SDGs and adaptation to climate change
- c. Finance for sustainable development – supporting water-friendly business

## SUGGESTED CROSS-CUTTING ISSUES

### **SHARING** – Sustainability through stakeholder involvement

(SDG link: Water target 6.b and SDG's 3, 15 and 17)

- a. Sharing solutions and good practices
- b. Involving all: public, private, civil society – women and men – young and old - in bottom up and top down approaches
- c. Water cultures, justice and equity – IR 4.4

### **CAPACITY** - Education, capacity building and technology transfer

(SDG link: Water target 6.a and SDG's 4 and 17)

- a. Enhancing education and capacity building – IR 4.5
- b. Science and technology – 7<sup>th</sup> World Water Forum S&T Process
- c. ICT and monitoring
- d. International cooperation

### **GOVERNANCE** - Water governance for the 2030 Development Agenda

(SDG link: Water target 6.5, SDG 17)

- a. SMART implementation of IWRM - IR 3.4
- b. Cooperation for reducing conflict and improving transboundary water management – IR 4.3
- c. Effective governance: Enhanced political decisions, stakeholder participation and technical information – IR 4.2

**au Mexique, du 1<sup>er</sup> au 4 juin 2016**  
**pour la 10<sup>e</sup> Assemblée Générale Mondiale**  
**du RIOB !**

"Mexico+20"

Il y a tout juste 20 ans, la première Assemblée Générale Mondiale du RIOB s'était tenue à Morelia au Mexique...

Cette année, après Fortaleza, au Brésil en 2013, c'est le Mexique qui accueillera, une nouvelle fois, la prochaine Assemblée Générale Mondiale du Réseau International des Organismes de Bassin (RIOB).

En vingt ans, la gestion par bassin s'est imposée, sur tous les continents, comme une nécessité pour faire face efficacement aux grands défis mondiaux.

Tous les trois ans, l'Assemblée Générale Mondiale du RIOB est l'occasion d'échanger entre les représentants des Organismes de Bassin du Monde entier et leurs partenaires et de mobiliser les réseaux régionaux pour débattre "d'une meilleure gestion de bassin pour faire face à ces grands défis mondiaux".

Quatre Tables Ronde sont programmées sur :

- l'adaptation au changement climatique dans les bassins ;
- le mandat, la composition, le rôle et les moyens des Conseils et Comités de Bassin ;
- la gestion durable des bassins : la planification et les financements ;
- la participation des secteurs économiques et des citoyens.

L'Assemblée Générale sera aussi l'occasion de tirer un premier bilan de la mise en œuvre du "Pacte de Paris sur l'eau et l'adaptation au changement climatique dans les bassins", d'ores et déjà signé par 342 organisations du Monde entier dans le cadre de la COP21 - 2015 de Paris et pour la préparation de la COP22 de Marrakech en 2016.

**Vous êtes invités à présenter vos expériences !**

du Secrétariat Technique Permanent,**
  
- The 2016 and 2017 budgets  
for the Permanent Technical Secretariat,**

**We certify that the yearly statements are regular and sincere,  
in accordance with French accounting rules and principles,  
and give a faithful idea of the result of the past fiscal year  
and of the financial situation and assets of the association**

## **Year 2016 – Année 2016**

### **Opinion sur les comptes annuels**

Nous avons effectué notre audit selon les normes professionnelles applicables en France ; ces normes requièrent la mise en œuvre de diligences permettant d'obtenir l'assurance raisonnable que les comptes annuels ne comportent pas d'anomalies significatives. Un audit consiste à examiner, par sondages, les éléments probants justifiant les données contenues dans ces comptes. Il consiste également à apprécier les principes comptables suivis et les estimations significatives retenues pour l'arrêté des comptes et à apprécier leur présentation d'ensemble. Nous estimons que nos contrôles fournissent une base raisonnable à l'opinion exprimée ci-après.

Nous certifions que les comptes annuels sont, au regard des règles et principes comptables français, réguliers et sincères et donnent une image fidèle du résultat des opérations de l'exercice écoulé ainsi que de la situation financière et du patrimoine de l'association à la fin de cet exercice.
